SUMMARY

Technical Systems Analyst with 8+ years of experience supporting business-critical applications and managing SQL Server databases. Strong background in incident management, troubleshooting, and ensuring system stability across industries such as banking, pharmaceuticals, retail, and port logistics.

Skilled in analyzing issues end-to-end, working with databases, and collaborating with cross-functional teams to deliver reliable solutions. Currently expanding expertise in cloud technologies and modern application architectures.

WORK EXPERIENCE

System Analyst - DBA SQL Server **Sep 2025 - Present**
FREELANCE SERVICES | Full-time | Remote | Global

- Administrative tasks on SQL Server.
- Ticket resolution in MSSQL environments.
- L2 incident analysis and troubleshooting.
- DBA activities including log supervision, backups, and log file management.
- Job failure diagnosis and resolution.
- Documentation and knowledge sharing in Confluence.

Tools & Technologies:

Putty · Linux/Windows · SQL Server · Citrix · MSSQL · Remote Desktop · Confluence

Cloud-Based Microservices Developer **abr. 2025 – sept. 2025**
ECOM UY | Full-time | Hybrid | Uruguay

- Participated in the design and development of cloud microservices and web applications within an Agile environment.
- Worked with Scrum methodologies and Jira for task management and sprint planning.
- Implemented and explored AWS solutions (Lambda, API Gateway), including service integration and basic API documentation.
- Researched and used AI tools for interface prototyping and simple workflow automation.
- Collaborated on Scrum Master activities, including creating epics, user stories, and managing the Jira backlog.

Warehouse Management System - Sr. DBA MSSQL

Dec 2023 – Oct 2024

GRUPO RAS | Full-time | Hybrid | Uruguay

- Provided technical and functional support for the company's Warehouse Management System (WIS) and its integrated ERP application.
- Handled incident management and user requests through the internal help desk, ensuring minimal downtime and high service quality.
- Developed and optimized SQL queries, views, and reports to meet business requirements and improve data visibility.
- Performed DBA activities in Microsoft SQL Server, including job scheduling, backup monitoring, and table synchronization.
- Supported the maintenance and troubleshooting of IT hardware, such as PCs, label printers, and Honeywell barcode scanners, ensuring operational continuity in warehouse environments.
- Collaborated with cross-functional teams to implement technical improvements and document system procedures in Confluence.

Tools & Technologies:

Microsoft SQL Server – WIS (WMS) – Help Desk System – Windows Server – Jira – Confluence – Hardware Maintenance

ERP Oracle Analyst

May 2021 – Sept 2023

GRUPO TATA | Full-time | Remote | Uruguay

- Delivered technical and functional support for Oracle Retail ERP modules (RMS, SIM, RPM, SIDOM, RIHA), ensuring business continuity for retail operations.
- Developed and optimized PL/SQL queries, views, and reports for troubleshooting, data validation, and process improvement.
- Monitored application and integration performance through Grafana, identifying incidents and coordinating resolutions.
- Managed NetSuite billing workflows and data consistency between financial and operational systems.
- Tested and validated API integrations using Postman, collaborating with development and QA teams.
- Acted as a liaison between business users and IT, ensuring efficient communication and issue tracking through Jira and Confluence.

Tools & Technologies:

Oracle Retail Suite – SQL/PLSQL – Grafana – NetSuite – Postman – Jira – Confluence – PuttY

Ssr. DBA MSSQL - Applications Support

Dec 2019 – May 2021

CLOSE-UP INTERNATIONAL | Full-time | Hybrid | Argentina

- Managed and maintained SQL Server databases, ensuring data integrity, performance, and availability across multiple environments.
- Supported and analyzed XML, JS, and HTML files used for internal applications and data exchanges.
- Monitored system performance and executed troubleshooting using SQL Server Management Studio (SSMS) and SQL Profiler.
- Developed and maintained SSRS (SQL Server Reporting Services) reports to meet business requirements.
- Handled SFTP transfers and FileZilla configurations for secure file exchanges between internal systems and external partners.
- Provided incident resolution through MANTIS ticketing system, collaborating with development teams to ensure timely issue resolution.

Tools & Technologies:

Microsoft SQL Server – SSRS – SSMS – SQL Profiler – XML – HTML/JS – FileZilla – MANTIS

Jr. SQL Server & SAP Ariba Analyst
SOUTHEND S.A. | Full-time | On-site | Argentina

Jan 2018 – Dec 2019

- Provided Level 1 support for SAP Ariba (On-Prem and Cloud), assisting users and coordinating incident escalation with global support teams.
- Performed SQL Server database queries and analysis for troubleshooting and reporting tasks.
- Utilized AQL (Ariba Query Language) for data extraction, validation, and business reporting.
- Collaborated with procurement and finance teams to ensure data accuracy and system reliability across integrated platforms.
- Documented procedures and incident resolutions to streamline future troubleshooting and improve response time.

Tools & Technologies:

SAP Ariba (On-Prem & Cloud) – Microsoft SQL Server – AQL – Excel – Windows Server

Jr. DBA SQL Server & Azure Administrator
KYRIOS DATA SRL | Full-time | Remote | Argentina

Jan 2015 – Dec 2018

- Performed proactive server monitoring and maintenance to ensure database performance and uptime.
- Managed backups, restorations, and log control for multiple SQL Server environments.
- Diagnosed and resolved database and server errors, collaborating with senior DBAs for complex incidents.
- Used tools such as SQL Server Management Studio (SSMS), dbForge Studio, and Quest Spotlight for performance tuning and troubleshooting.
- Worked with Oracle TOAD and SQL Plus for cross-database analysis and validation.
- Supported initial implementations in Microsoft Azure, focusing on SQL Server deployment and resource monitoring.

Tools & Technologies:

Microsoft SQL Server – SSMS– Oracle TOAD – SQL Plus – Windows Server – Linux

EDUCATION

Higher Technician in Systems Analysis | 2018 - Graduated 2021
IFTS N°18 – Buenos Aires, Argentina

Commercial Expert with Accounting and Tax Guidance | 2007 - Graduated 2011
Escuela de Comercio N°2 “Dr. Antonio Bermejo” – Buenos Aires, Argentina

SKILLS

- Analytical Thinking & Problem Solving
- Incident & Root Cause Resolution
- Team Collaboration & Communication
- Self-Learning & Adaptability
- Data Extraction (Clipping & Scraping)
